Personal Profile

Senior Full-Stack Web Developer with 6 years of experience building and maintaining modern web applications. Skilled in Nuxt.js, Vue.js, Laravel, Node.js, and MySQL, with proven expertise in creating scalable front-end systems, backend integrations, and PDF/signature automation workflows. Known for collaborating closely with cross-functional teams and delivering high-quality solutions for enterprise clients.

Professional Experience

Senior Full-Stack Web Developer, IdeaHub IT Solutions Provider Inc.

July 2023 - Present

Projects for PropNex (Real Estate Client)

- Enhanced and maintained a large-scale Document Management System.
- Integrated DocuSign workflows by coordinating with backend team for setup.
- Developed an alternative PDF signing feature: enabled users to upload signatures, with backend processing to embed images into PDF documents.
- Built mobile webviews using Nuxt 3 and worked with the mobile team to implement advanced features (file uploads, PDF/image downloads, WhatsApp and social sharing).

Intermediate Full-Stack Web Developer, IdeaHub IT Solutions Provider Inc.

July 2021 - July 2023

Projects for PropNex (Real Estate Client)

- Developed an Admin Dashboard for property management using Nuxt.js.
- Built a Marketing Site App (custom HTML/email template maker with export to PDF) using Nuxt.js + Node.js Express.
- Enhanced a Webinar Platform with Zoom SDK integration (PHP-based).
- Improved and redesigned a Document Management System frontend (Nuxt.js + Node.js Express backend).

Frontend Web Developer, IdeaHub IT Solutions Provider Inc.

June 2019 - July 2021

- Fixed bugs and improved design for existing Laravel + Vue.js projects.
- Built an e-commerce application using Laravel and Vue.js.
- Developed a Virtual Classroom App frontend with Quasar and Zoom integration.
- Created a Delivery App frontend (Nuxt.js) with Google Maps API + backend APIs.
